Actinovate SP is Registered For Sale in Turkey

February 5, 2007 (Houston, TX)- The biological fungicide, Actinovate, manufactured by Natural Industries, has been approved for sale in Turkey.

Actinovate is water-soluble powder for use as a soil drench against root diseases or as a spray against foliar diseases. Actinovate contains the active ingredient *Streptomyces lydicus* WYEC 108, a patented microorganism that grows on the roots and foliage of plants. Actinovate is a powerful disease control tool for greenhouse, nursery and agricultural growers.

When used as Actinovate can effectively suppresses and controls a wide range of soil borne diseases including *Pythium*, *Phytophthora*, *Fusarium*, *Rhizoctonia*, *Verticillium* and other root decay fungi.

Actinovate has a 1-hour REI (re-entry interval) as well as a 0-day PHI (pre-harvest Interval). Actinovate is listed with OMRI and can be used in organic agriculture.

“Turkey is a very important agricultural country” said Natural Industries President, Matt Kowalski. “We are very proud to have Actinovate approved for sale there.”

Turkey-based product representatives will facilitate all Actinovate orders for the sale and shipment of the product in Turkey.

Natural Industries

Natural Industries, Inc. of Houston, Texas specializes in developing beneficial microorganisms for use in the commercial horticulture, agriculture and turf industries. In addition to its flagship product, Actinovate SP, Natural Industries also manufactures Actino-Iron, a biological fungicide for soil incorporation; DeThatch-9, a microbial thatch reducer/compost accelerator; and Actinovate AG, a biological fungicide for outdoor agricultural production.
